

**Monday 13<sup>th</sup> March 2017**

The ducklings returned to school today and everyone was surprised at how much they have grown over the weekend.

They were happy to see the children and the children were happy to see them.

We have been thinking about growth and change as part of Science Week. We talked about how the ducklings are bigger and that they have changed a lot in a week. We weighed one of the ducklings and we are going to weigh them again to see how much they have grown.

This duckling weighed 115g.

As the ducklings have grown they have a new house now which is much bigger for them to stretch their wings!
