

This week we talked about fire safety and our fire circle rules. Once the fire was built we got to toast a marshmallow.

Then we became bug detectives and went exploring for bugs around the site. When we returned to our base we identified the bugs we found which included beetles, woodlice and worms.

We also got to build dens. We had to work as a team to design our den, find a suitable place to construct it and collect the materials we required. We enjoyed sitting inside our dens!

We are looking forward to our next visit!
