

Safer Internet Day 2016

Tuesday 9th February was Safer Internet Day. Here at Garlinge Primary School teachers and children took the time to explore what the internet means to us. Children were asked to make a poster of what they like to use the internet for. Teachers discussed with pupils some of the dangers there could be and how to be safe on-line. The classes also discussed how we should behave towards people when using the internet: That we should treat all people with respect and politeness whether we are on-line or face to face. Here are some examples of the children's posters.
