Other activities for the week

- **Read-** Read to yourself, siblings or adults. You could even email your teachers and tell them about the book you are reading and why you like it.
- **Maths** – Further practise your times tables and divisions by following the link below.
- <https://www.topmarks.co.uk/maths-games/hit-the-button>
- **Times tables-** Keep practising your times tables on Times Tables Rockstars.

- **DIY Jellyfish-** Make your own Jellyfish by following these instructions <https://www.craftiments.com/2013/04/glow-in-dark-jellyfish-craft.html> (it doesn't have to be glow in the dark.)
- **Apple Oxidation-** What works best for keeping an apple from turning brown? Test to find out! Slice up an apple, and let each slice soak in a different liquid (water, vinegar, orange juice, salt water etc.). Then take them out, lay them on a tray, and check the brownness after three minutes, six minutes, and so on. Not only does this test the properties of different liquids, it also helps students practise the scientific method if they create hypotheses about which liquids would be most effective.
- **Water walking-** You'll need six containers of water for this one: three with clear water, one with red food colouring, one with blue colouring, and one with yellow colouring. Arrange them in a circle, alternating coloured and clear containers, and make bridges between the containers with folded paper towels. Your kids will be amazed to see the coloured water "walk" over the bridges and into the clear containers, mixing colours, and giving them a first-hand look at the magic of capillarity. Follow the link for detailed instructions <https://funlearningforkids.com/rainbow-walking-water-science-experiment-kids/>
- **DIY story stones-** Take rock painting a step further: After the paint's dry, the images on the stones become characters in a story everyone can tell together.
