

Traditional Tales

We have been looking at the story of Jack and the Beanstalk. We read the story together and identified the different characters and the setting. We thought about the characters in the story and used describing words to talk about them.

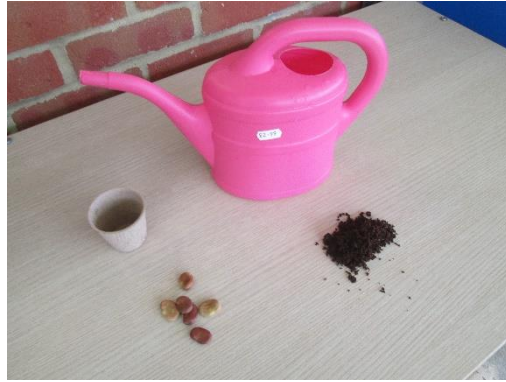

We measured the characters with cubes and identified which character was the shortest and which character was the tallest.

We used this skill to measure and order the heights of different beanstalks.

We used magic beans to help us with our counting and combining amounts.

We also planted some beans and talked about what they needed to grow.

Look at how much they grew!!
