- Maths, English and Afternoon Sessions will be each week day, unless stated otherwise.
- Please arrive on time to the sessions to avoid missing out.
- Record any work in a home-learning book or on paper. This can then be photographed and emailed to your class teacher.

### Maths

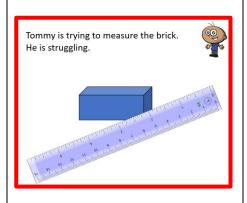

### <u>Focus-</u> To understand how to measure length

Practice times tables playing game

https://www.topmarks.co.uk/ma ths-games/hit-the-button

What do you already know about measuring length? What units can you measure length in? What equipment do you use to measure length? Watch video https://vimeo.com/503131096

### Monday

### **English**

### <u>Focus-</u> To be able to use headings and subheadings.

This week we are going to be looking at a non-chronological report. When we write a non-chronological report, we must use headings and subheadings. So we are going to learn how to use these effectively.

Watch these...

https://www.youtube.com/watch?v=JpVTo7bTnXU

https://www.youtube.com/watch?v=Ghaht iEF9v4

https://www.youtube.com/watch?v=b0vbptjyW8M

Now, look at the example of a nonchronological report below and label the heading and then the subheadings.

Next, look at the page of paragraphs. It is your task to read the information and put a good heading for the whole text and then give each paragraph its own subheading.

### Topic

### <u>Focus-</u> To be able to locate the main features of Greece.

Greece is the southernmost country in Europe. The mainland has rugged mountains, dense forests and beautiful lakes. Follow the links to discover more.

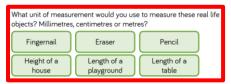

https://www.natgeokids.com/uk/discover/history/greece/10-facts-about-the-ancient-greeks/

https://kids.nationalgeographic .com/geography/countries/artic le/greece

Task 1: Using an atlas or the map provided in the resource section, locate Greece and the UK on the blank map which follows.

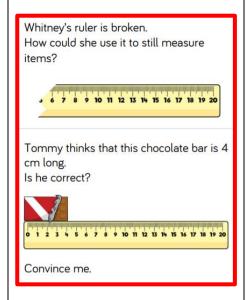

Task 2: Use the map of Greece in resources to support you to answer the questions which follow.

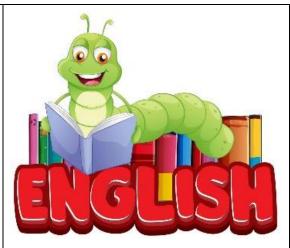

What would be the best equipment to measure your pencil with? What would you measure the classroom with? What would you measure the circumference of your head with?

Complete the worksheet in the resources section.

### **Challenge**

### ΔΠϹΦΣΠΤ GRΣΣCΣ

### Maths

### Focus-To be able to measure length in metres.

Practice your mental maths by playing game

https://www.topmarks.co.uk/learning-to-count/blast-off

Today we are going to be looking at measuring in metres. Watch video

https://vimeo.com/504466031

### Tuesday English

### <u>Focus-</u> To be able to identify the features of a non-chronological report.

This week we are going to be start looking at Modern Greece. We are going to understand what a non-chronological report is and begin planning the information we want to include in our writing next week.

So, our new focus is Modern Greece. We are going to be looking at the culture and lifestyle lived by Greek people.

Before we research facts about Modern Greece, we must understand what the features of a non-chronological report are.

### Watch this:

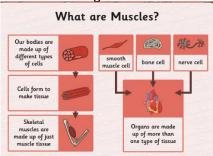

https://www.youtube.com/watch?v=b0vbptiyW8M

### <u>Science</u>

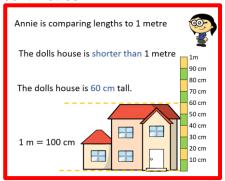

### <u>Focus-</u> To know why we need muscles to move.

What are muscles? Why do we need them?

The images below (also found in resource section) explain more about muscles and new words related to using them.

What might you measure metres in? Are they larger or smaller than centimetres?

Use the counting stick on Mathsbot

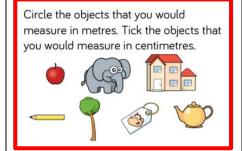

https://mathsbot.com/manipulatives/countingStick

to practice counting in groups of 10cm. What do you notice about 100cm? Try starting at different starting points.

Complete the worksheet in the resources section below.

### Challenge

Explore these links to understand what a non-chronological report is and to see some examples of non-chronological reports:

https://www.theschoolrun.com/what-is-a-non-chronological-report

https://www.teachwire.net/news/nonchronological-report-ks2-examplesworksheets-and-

resources#:~:text=A%20non%2Dchronol ogical%20report%20is,information%20on %20subjects%20or%20events.

https://www.literacywagoll.com/non-chronological-report.html#

Now, try to create a list of features for a non-chronological report.

Have a look at this list to help you:

- An eye-catching heading in a large font
- An introductory paragraph
- Text split up into paragraphs and each paragraph on a different aspect of the subject
- Sub-headings for each paragraph
- Usually written in present tense
- Pictures of the subject
- Captions under each picture to explain what is in the picture
- Diagrams with labels
- Lists of facts in bullet points
- Graphs or charts showing information about the subject
- Boxes containing interesting individual facts to grab the attention of the reader
- Technical vocabulary in bold, possibly with a glossary at the end

Now, look at the example of a nonchronological report below in the resources section and label it with all the features in list above or use the checklist in the resources section below to help you.

### Voluntary and Involuntary

Some muscle movement is voluntary and we can control it. Other muscle movement is involuntary and we don't have control over it.

Look at the pictures to the right: Which shows voluntary muscle movement and which shows involuntary?

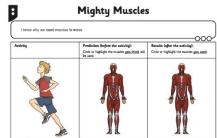

Discuss with your partner and explain why you made your choice.

Why do we need muscles for movement? Follow the link to discover more.

https://www.bbc.co.uk/bitesize/clips/zpp6n39

TASK: Predict which muscles you will use for each activity. Found in the resource section below.

Why not have a go at creating the muscles of the arm. Simply follow the instructions found in resources.

### Maths

### <u>Focus-</u> To be able to recognise equivalent measures m and cm

Practise times tables by playing game

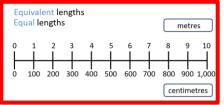

https://mathsframe.co.uk/en/resources/resource/306/Maths-

Fishing-Multiplication

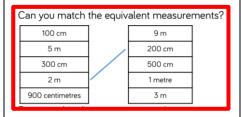

Today we will be learning how to convert metres and centimetres. Watch video

https://vimeo.com/504467081

If there are 100cm in a metre, how many centimetres are in 2 metres? How many centimetres in 3 metres? Do we need to partition 235 cm into hundreds, tens and ones

to convert it to metres? Is it more efficient to partition it into two parts? What would the two parts be?

Complete the worksheet in the resources section.

### **Challenge**

### Wednesday

### **English**

### <u>Focus-</u> To be able to plan information for a non-chronological report.

This week are going to be researching facts for our non-chronological report about Modern Greece.

Today you are going to research facts and information about Modern Greek culture.

### Think about:

- 1. What food they eat?
- 2. What animals are in Greece?
- 3. What their flag looks like and why?
- 4. What their capital city is and any facts about that city?
- 5. What currency they use?
- 6. What religion is followed in Greece?
- 7. What language is spoken?
- 8. What the climate/weather is like in Greece?

Now, complete a mind map explaining all the different facts you can find out about Modern Greece.

### RE

### Focus- To understand why Christians celebrate Easter.

During Holy Week Christians try to remember what happened to Jesus. Follow the links below to find out more.

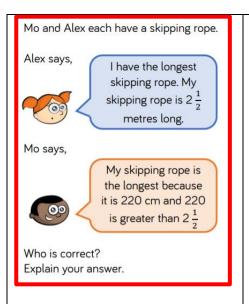

Scroll down to watch the Easter Story clip. Continue reading the key events for the week then complete the ordering of events quiz which follows.

https://www.bbc.co.uk/bitesize/topics/ztkxpv4/articles/z4t6rj6

https://www.twinkl.co.uk/resource/t-re-231-holy-week-powerpoint

Draw images to complete the Easter Story comic strip found in the resources section below.

### Maths

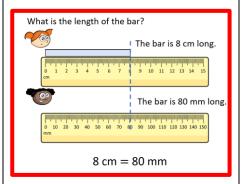

### Focus- To be able to convert mm and cm

Practise your mental maths by playing game

https://www.topmarks.co.uk/maths-games/mental-maths-train

Recap yesterday's learning. How many centimetres are there in a metre? How many millimetres are in a centimetre? Watch video https://vimeo.com/504918866

What items might we measure using millimetres rather than centimetres?

If there are 10 mm in 1 cm, how many mm would there be in 2 cm? How many millimetres are in

### Thursday

### English

### Focus- To be able to retell a story.

As it is World Book day today we would like you to think about your favourite book or story. You are going to retell that story. It can be any story at all.

Task 1 – create a mind map of all the different stories you know – if you are struggling here is a list of Traditional Tales with a video link to help you:

- Little Red Riding Hood -https://www.youtube.com/watch?v

   LDMWJCrDVMI
- Jack and the Beanstalk -https://www.youtube.com/watch?v

   W5rxfLRgXRE
- 3. The Gingerbread Man https://www.youtube.com/watch?v =pckuS--UIV4

Task 2 – use the story board template to correctly order the key events from your chosen story and write a sentence to describe it.

Task 3 – lastly, use the writing frame below to neatly write out the retelling of your favourite story. Remember to use correct punctuation and exciting vocabulary.

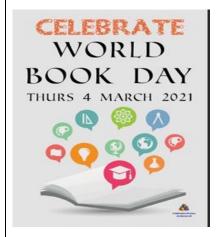

### **WORLD BOOK DAY**

<u>Focus</u> – To celebrate the joy of books.

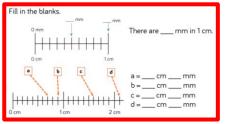

Today is World Book Day. Follow the link to find several activities you could try to celebrate the joy of books and reading.

https://www.worldbookday.co m/

Why not choose your favourite book and draw the front cover which can be shared and displayed around the class. Maybe you could design your own World Book Day book mark using the template provided in the resources section below.

half a cm? How many different ways can you partition 54 cm?

Complete the worksheet in the resources area.

### <u>Challenge</u>

Rosie is measuring a sunflower using a 30 cm ruler. Rosie says,

Rosie is incorrect.

Explain what mistake she might have made.

How tall is the sunflower?

### Friday

### **English**

<u>Focus-</u>To be able to find key information in a text to answer questions.

Watch the links...

https://www.bbc.co.uk/bitesize/topics/zs4 4ixs/articles/zgmyw6f

https://www.youtube.com/watch?v=q4Y\_67GMkP4

Think about what the strategies we have been using in class this term. Try to list them with your adult.

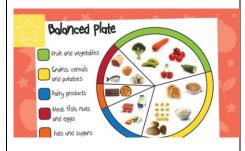

If you can't remember, have a little look at this list:

- 1. Read the text 3 times.
- 2. Read the first question.
- 3. Underline the key words in the question.
- 4. Find the key words from the question in the text.
- 5. Read the sentence the key words are in.
- 6. Find and write your answer to the question.
- 7. Repeat step to 2 6 with the other questions.

Now, using the steps above, complete the reading comprehension in the resources section below.

### **PSHCE**

<u>Focus-</u> To understand what makes up a balanced diet.

Today we will be looking at what makes a balanced diet and identify the foods we need to eat regularly to maintain good health. This links nicely to the Science we have covered already in term 3. Follow these links to discover more.

https://www.bbc.co.uk/bitesize/topics/zrsb87h/articles/zjj6pg8

Think about these questions: What does a balanced diet look like?

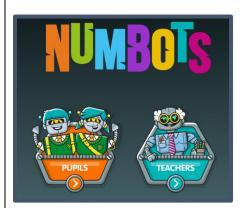

- What do we know about healthy eating and how it can help keep our bodies healthy?
- Who makes the choices for us about what we eat and drink?

### Maths

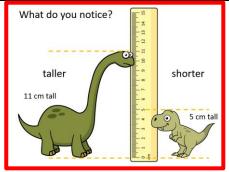

### Focus- To be able to compare lengths

Practise your mental maths by playing Numbots. Remember to use the same login details as you do for Times Table Rock Stars.

https://play.numbots.com/#/account/school-login-type

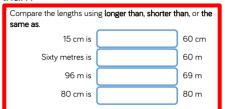

Think back to all your previous learning this week. Remind yourself of how many mm are in a cm and how many cm are in a m? Watch video <a href="https://vimeo.com/505647236">https://vimeo.com/505647236</a>

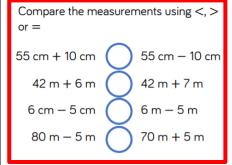

Which symbols can we use to compare lengths? What is the difference between using taller than and longer than? When would we use taller than instead of longer than?

### Challenge

- What choices are we able to make for ourselves?
- Are these always the right choices?
- What helps us to choose?
   Why not try to note the foods you eat for the week in the food diary found in the resource section below.

Why not create a poster advising of the healthy food choices we could make.

### Other activities for the week

<u>Reading-</u>Busters book club- Make sure you are reading at home either to yourself, to an adult or even a sibling. This week your reading challenge is to read a book involving magic. Send your class teacher a picture of you reading your book involving magic!

### French-

<u>PE-</u> Check out the Garlinge PE teams videos on the school website in the home learning section. Alternatively, why not continue to improve your personal challenges (found in resource section below if you haven't already attempted this task).

<u>World Book Day -</u> Create your own book- Ask your child to come up with a main character, setting and a special object (such as a magical key, a treasure map, a strange book or a broken lamp) and let their imagination run wild. Let them plan their story first, talk about the ideas they have and the flow of the story (beginning, middle and end). Once they have planned their story they can write a draft. Then they can then create a book using paper and add drawings to their story or they can use a computer to create their books. This activity can be done over a couple of days.

Put on a play- Children can create their own play to perform to their adults once they have rehearsed and found costumes. Let their imaginations run wild or you could give them a topic to base the play on (for example a topic they've learnt about in school or their favourite book).

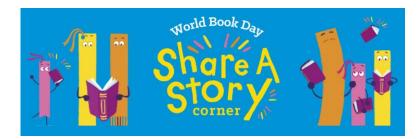

Change the story – Choose your favourite story or a book that you have recently read. Change the story by changing the actions of one of the characters. Maybe they do something different when it's a big event that changes everything! Change the story into a very simple version for young children and illustrate it too. Change the story (or part of it) into a comic strip. Change the story (or part of it) into a poem.

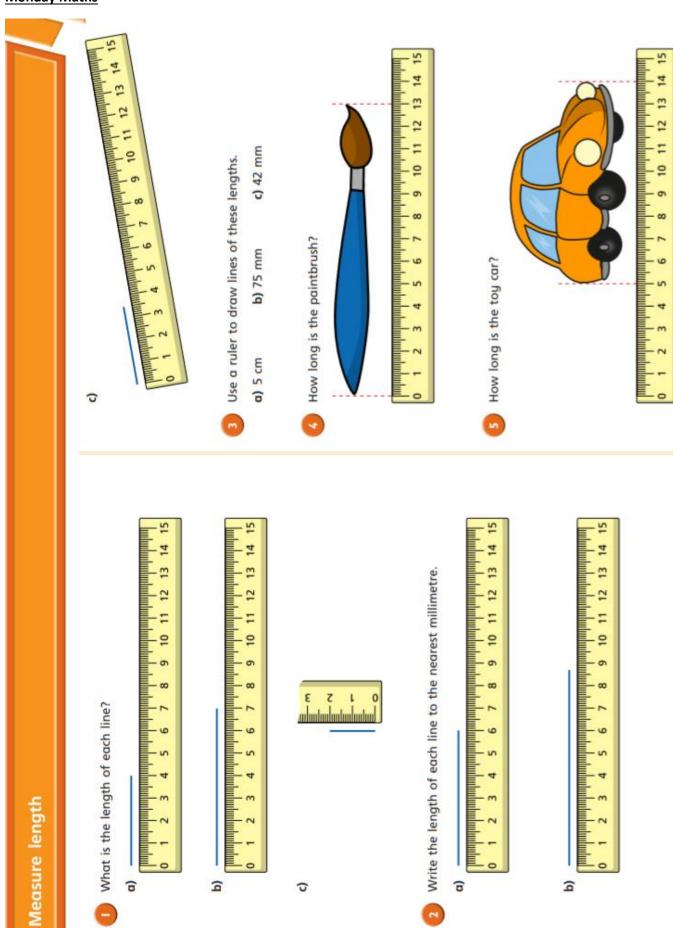

Listen to a story – Why not choose a story to share together in the book corner. Don't forget to send any pictures to your teachers of the fun extra activities that you choose to complete. https://www.worldbookday.com/share-a-story-corner/

Û

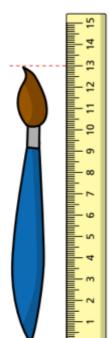

3 Use a ruler to draw lines of these lengths.

a) 5 cm

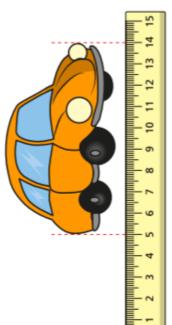

**b)** 75 mm

c) 42 mm

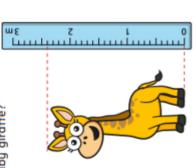

4 How long is the paintbrush?

How long is the toy car?

6 How tall is the baby giraffe?

7 Which is the most sensible estimate for the height of a classroom door?

### The World by Kate Ruttle

### Continents

The world is made up of seven continents which are called: Africa, Antarctica, Asia, Europe, North America, Oceania and South America. Each continent is a large area of land and most continents are made up of a lot of different countries. Most of North America is one country, the United States of America, which is separated into **states**. Canada is also in North America and is a separate country. No people live on Antarctica so it doesn't need different **countries**. Although Antarctica (which is at the bottom of a globe) is a continent, the Arctic (which is at the top of a globe) is not a continent. This is because the Arctic is made entirely of ice – there is no land under the ice. In Antarctica, there are rocks and land under the ice.

### Oceans

The continents are surrounded by **oceans**. The 5 oceans of the world are called the Atlantic Ocean, the Arctic Ocean, the Indian Ocean, The Pacific Ocean and the Southern Ocean. Parts of the oceans which are near to land are sometimes called **seas**, like the North Sea, the Irish Sea and the Caribbean Sea. The Arctic Ocean is at the north of the world and the Southern Ocean is at the south of the world. They are the two coldest oceans.

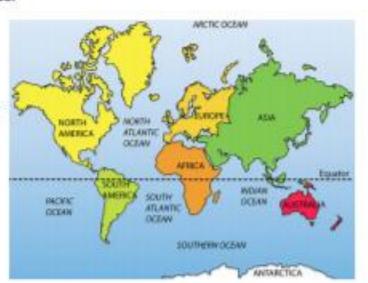

### The equator and the poles

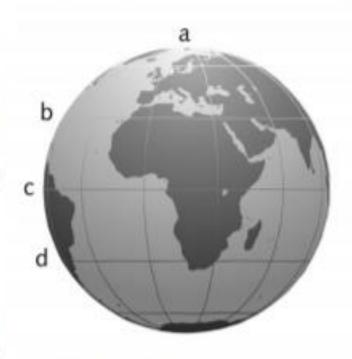

If you could draw a line across the middle of the world you would be drawing a line around the fattest part of the **globe**. Most globes and **maps** show this line although it is imaginary and you can't see it on the ground. It is called the **equator**. Countries which are nearer the equator are usually hotter than those that are further away from it. The coldest places in the world are furthest away from the equator, at the top and bottom of the globe, and these are called the **poles**. The place which is at the very top of the world is called the North Pole and the place at the very bottom of the world is called the South Pole.

### Climate and seasons

The **dimete** of different places on the globe is very different. At the top and bottom of the earth, around the poles, the climate is very cold

all year round. In these places, there are two climates which are called Winter and Summer. In Summer it is cold and the ice is thick but in Winter it is even colder and the ice is even thicker.

Near the equator, it is not all year round but there are usually two seasons: a dry season and a wet season. During the wet season the rain comes every day and is often very heavy. In the dry season, there may be no rain at all for a few months. Most of the world's tropical rainforests are near the equator because rainforest plants need a lot of water to survive.

In between the equator and each of the poles, the dimate is not as hot as the equator or as cold as the poles. Places in these parts of the world usually have 4 seasons: Spring, Summer, Autumn and Winter, although the months in which they have those seasons is different in different places.

### Glossary

Climate - the kinds of weather a place usually has.

Country - cities, towns and countryside which share the same laws.

Equator - a line across the middle of a map or a globe.

Globe - a model of the world which is the same shape as the world. It shows land and sea.

Map - a flat drawing of the world. It shows land and sea.

Ocean - a very large area of salty water.

Poles - the places at the top and bottom of the world.

Sea - areas of water near to where people live can be called seas.

States - large areas of North America which share the same laws.

### Task 2 – Add your own heading and give each paragraph a subheading

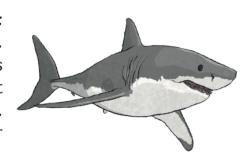

### **Heading** -

<u>1.</u>

Sharks are a type of fish but instead of having bones, their skeleton is made of cartilage. This is what your ears and the tip of your nose are made from. There are more than 500 different species of shark, including the great white shark, grey reef shark, hammerhead shark and tiger shark. Scientists believe that sharks have been in our oceans for around 455 million years. Some species of sharks prefer to live alone while others live in groups called a school or shoal.

2.

Sharks can be found in all of the Earth's five oceans: the Atlantic, Pacific, Indian, Arctic and Southern. Some sharks can even be found in freshwater lakes and rivers. Different species of shark live in different oceans depending on the temperature of the water. Most prefer warmer temperatures though polar sharks prefer colder water.

<u>3.</u>

What a shark eats depends on its species and where it lives. Most sharks are carnivores because they like to eat fish and other sharks. Some larger sharks eat dolphins, sea lions and small whales. Smaller sharks eat smaller prey such as clams, crabs and squid.

Some types of shark can be deadly, but only about 12 species have ever attacked humans. In fact, shark attacks are not very common. More people die from bee stings and natural disasters such as earthquakes and volcanoes each year than from shark attacks.

4.

Sharks have all the senses that humans have; smell, sight, touch, taste and hearing. The strongest is their sense of smell. Sharks can smell a single drop of blood in the water from 400 metres away. They can also hear fish moving from around 500 metres away. Sharks have very good eyesight and they can see in low levels of light.

Most shark species would die if they stopped moving. As long as they keep swimming, water keeps moving over their gills, which keeps them alive.

### Ancient Greece

Nearly four thousand years ago, in the countries that we now know as Greece, Turkey and Bulgaria, the earliest Greek civilisations prospered. Between 2000BC and 146BC, their dominant empire spread throughout most of Europe, as far as France.

### The Government

The Greeks developed a new idea for a government- democracy. As a result, Ancient Greece was split into many different states, which were each ruled in their own way. Moreover, each state had its own laws, government and money however they shared the same language and religion. At this time, the two important states in Greece were Athens and Sparta.

### Greek Gods

Religion was important to the Greeks because they believed that it would make their lives better while they were living. Furthermore, many Greeks believed that the gods would care for them when they died. The Ancient Greeks believed in a large number of influential gods and goddesses. In fact, they believed that these gods and goddesses controlled everything in their lives and the environment.

In addition, there were 12 major gods who ruled Mount Olympus.

These gods were:

- Zeus
- Hera
- Hephaestus
- Athena
- Hermes
- Artemis

- Apollo
- Dionysus
- Ares
- Aphrodite
- Demeter
- Poseidon.

### Glossary

States - Territories of land

Zeus - King of the gods

Mount Olympus - Home of the major Greek gods.

**Temple -** Housed the statues of gods.

### Greek Writing

Amazingly, the Ancient Greeks played a vital part in the development of the alphabet we use today because their alphabet was the first with vowels. Did you know that the first two letters of the Greek alphabet 'alpha' and 'beta' gave us the word alphabet? Unlike our alphabet, the Greek alphabet consisted of unusual symbols such as  $\Gamma$  (gamma) and  $\Delta$  (delta). Interestingly, this alphabet is still used in Greece today.

### Greek Buildings

To show the gods how important they were, the Greeks built colossal temples in every town for one god or goddess. The temples were not like modern places of worship- they were homes for statues of god, cared for by priests. As a result, religious ceremonies and festivals were held outside the temples. A few of these temples can still be found today

### Did you know...

That the Ancient Greeks invented theatre?

They loved to watch plays and most cities had a theatre – some big enough to hold 15,000 people!

around Greece including The Parthenon (dedicated to the goddess Athena), which can be found in Athens, Greece.

### **Map of Europe**

### Map of Europe

000

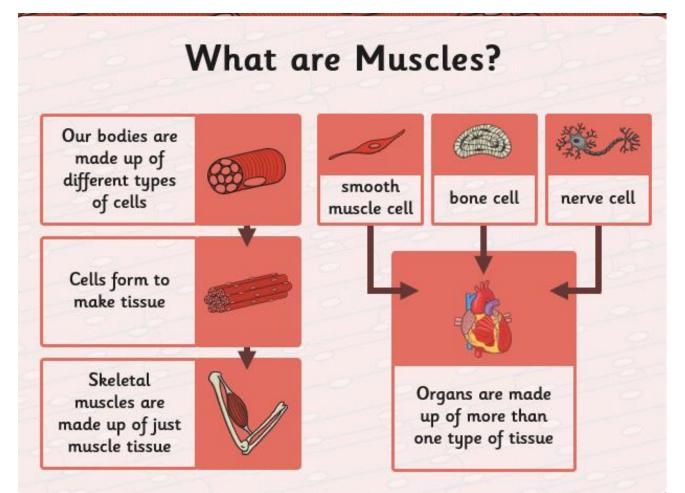

### **MAP OF GREECE**

- 1. Which 4 countries border Greece?
- 2. What is the capital city of Greece?
- 3. Which seas surrounds Greece?
- 4. Which country lies to the right of Greece?
- 5. What is the name of the island north of Greece?

### Voluntary and Involuntary

Some muscle movement is voluntary and we can control it. Other muscle movement is involuntary and we don't have control over it.

Look at the pictures to the right: Which shows voluntary muscle movement and which shows involuntary?

Discuss with your partner and explain why you made your choice.

# Mighty Muscles

I know why we need muscles to move.

Activity	Prediction (before the activity):	Results (after the activity):
	Circle or highlight the muscles you think will be used.	Circle or highlight the muscles you used.

### How to make a muscle of the arm.

Use sellotape to tape a ball to one end of a tube of card.

In both cards make 2 holes 5cm from the end of the card and opposite each other.

Unfold a paperclip, stick through the hole (do this for both tubes)

Pass an elastic band over one of the ends of a paperclip, stretch down both tubes and attach to another paperclip.

Tape over both paperclips' ends. Repeat with the other elastic band and other ends of the paperclips.

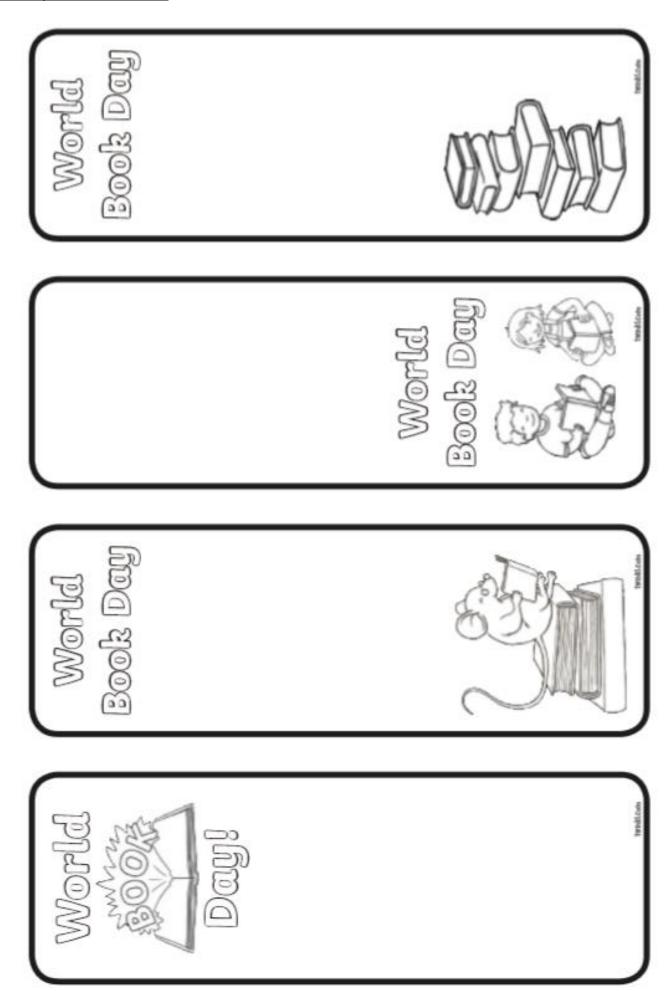

Tape the top elastic band on to the 'forearm' tube, about 5 cm from the ball.

Separate the other elastic band(on the bottom) and tape to the ball

# Easter Comic Strip Draw a comic strip about the events of the Easter story.

Jesus carried his cross through the streets of Jerusalem.	Some women went to the tomb to visit Jesus' body. An angel told them that Jesus had risen from the dead.
Jesus went to the Garden of Gethsemane to pray. Then, he was arrested by soldiers.	Jesus' body was buried in a tomb and a big stone was placed across the entrance.
Jesus celebrated the Passover meal with his friends.	Jesus died and the sky then turned dark.
Jesus rode into Jerusalem on a donkey.	Jesus was nailed to a cross in-between two thieves.

### The TEAM GARLINGE Personal Challenge Activity Card

### What is it?

We would like you to complete the following challenges whilst you are at home. The challenges have been chosen to help you in your future PE lessons.

The aim is to complete the challenges that you can and use the school values to help you improve!

As long as you complete the challenges safely, you can adapt the activities to suit you and your environment!

Because this is about YOUR personal best and YOU improving YOUR skills!

### THE CHALLENGE:

Have a go at the different activities and record your scores on the score card or a piece of paper.

Practice the activities to see if you can improve your best scores!

For every challenge you complete you will also earn points for your House!

Write how the School Values helped you.

### IMPORTANT

Please remember that these challenges have been designed to hopefully enable all abilities to participate in a personal best challenge.

Each activity has an easier and harder option for your child to try.

The challenges can be adapted to sitting and adapted to individual's abilities.

Please email PE@garlinge.kent.sch.uk for further guidance if needed.

### You will need:

- · A ball of socks!
- Stopwatch/timer or clock
  - Paper and a pen
- A bucket or target

### Share your success!

If you would like your child's picture of them doing the challenges, uploaded onto the school website or Twitter page, then please email pictures and permissions to PE@garlinge.kent.sch.uk
Go Team Garlinge!

### Personal Challenge Score Card

Name: \_\_

Class:

HOUSE COLOUR:

### LEG BALANCE

Balance on 1 leg and time how long you can balance for. Stop the time when your other foot touches the floor.

Time how long you can balance on your left leg and on your right leg.

Try from a seated position

Can you hold your balance with your eyes closed?

### Arm Holds

Raise one arm and time how long you can hold it for. Stop the time when you put your arm down.

Time how long you can raise your left arm and on your right arm.

Is it easier to hold your arm to the side or out in

Can you hold something like your water bottle whilst holding your arm out?

### Sock Throw

Find a target, for example a piece of paper or bucket, choose how many steps you would like to throw from and see how many times can you throw your ball of socks into the bucket, collect, return and throw again in 1 minute.

Try placing your target closer to you Try aiming for a smaller

### Clap and Catch

Throw your ball of socks into the air and see how many times you can clap before you catch them. You will get 1 point for every clap you do remember you have to catch the socks to score!

Throw your socks and see how many times you can lap or tap your leg before the socks land on the

Can you clap and then catch with one hand?

### One leg Balance

LEFT

RIGHT

How long can you balance?

### Arm Holds

LEFT

RIGHT

How long you can hold your arm in the

### Sock Throw

How many can you do in 1 minute?

### Clap and Catch

What is your highest number of claps?

### Speed jumping

Place your ball of socks on the floor and see how many times you can jump over them and back in 1 minute!

Give yourself 1 point for every jump!

Try stepping over the socks

Can you keep going without stopping for 1 minute?

### Star Jumps

How many star jumps can you do in 2 minutes? Remember to pace yourself. If 2 minutes is too long then try 1 minute to start with.

Try lifting your arms up and down from a seated position

Can you keep going without stopping?

### <u>Agility</u>

Jog on the spot and get 1 point for each minute you can do without stopping.

Remember to pace yourself!
Swing your arms in your chair
and 1 point for each minute you
do without stopping.

Lay out your socks apart from each other, eg, 10 steps apart.

How many times can you run and touch each sock in 2 minutes? Get 1 point every time you touch a sock, how many points can you get?

### CREATE YOUR OWN CHALLENGE

Can you create your own challenge that helps with<sub>ov</sub>

Balance

Co-ordination

Jumping Running

Throwing or Catching?

ALWAYS MAKE SURE YOU CARRY OUT ALL CHALLENGES IN A SAFE WAY!

PERSEVERANCE – How many or how long you can do a challenge without giving up?

ASPIRATION – Can you aspire to achieve these targets? Can you Aspire to do more?

RESPECT – Remember to respect your body, only do what you can!

TEAMWORK – Can you work with someone you live with and help each other?

### Speed Jump

How many can you do in 2 minutes?

### Star Jumps

How many in 1 minute?

### **AGILITY**

How many laps or minutes did you complete?

How have the School Values helped you?

Write here how each value helped you with your personal best
